Joseph Correia, Health Agent

July 21, 2014

ATTENTION SEPTIC INSTALLERS

On May 6, 2014, the Board of Health voted to make it mandatory that an electrical permit be obtained by a licensed electrician and that a final inspection of the electrical work be conducted by the Acushnet Electrical Inspector. Approved electrical work must have a valid inspection sticker affixed to it prior to any final inspection given by the Health Agent on any septic system that requires an electrical pump or an electrical alarm system.

Per 310 CMR 15.231

(9) All pumps must be equipped with a high water level alarm located in the building served which is powered by a circuit separate from the circuit to the pumps.

Thank You

Joseph Correia
